## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-20 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on July 06, 2005.

### ***Response to Arguments***

3. Applicant's arguments filed on September 22, 2005 have been fully considered but they are not persuasive.
4. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, one of ordinary skill in the art would have reasonable expectation of success if the belt carrying transfer is substituted by the system suggested by the secondary references, with the benefits indicated in the previous action.

Applicants argue that the primary reference, Otto et al., teaches a system in which the web has to be calendered while being transported between two fabrics/belts, which teaches away from using the non-contacting system of the secondary references, Svanqvist et al or Hultcrantz et al. This is also unconvincing, because Otto et al. teach that the calendering, even though a desired, is not required, column 5, lines 29-40. In the same lines they teach that tissue can be transferred to the reel using the common vacuum roll system. One of ordinary skill in the art would recognize the advantages of using the system suggested by the secondary references for those situations. Moreover, figures 5 and 6 see below, show embodiments in which the calender stack is positioned in a converting finishing line. This would suggest to one of ordinary skill in the art that similar system could be implemented at the drying system, e.g., the unwinding section would be the throughdrying section of figures 1-3. Such implementation would be within the teaching of Otto et al., since they teach that the invention was described with reference to preferred embodiments and that one of ordinary skill in the art would recognize different variations without departing from the spirit and scope of the invention.

5. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

### *Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1731

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
